PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building and connecting modern front-end applications (Angular, React) with robust back-end services (Java, Python, C#). Proven experience in engineering high-availability systems at Xero and building complete features from the ground up. Passionate about writing clean, efficient code and building secure, scalable, end-to-end solutions. Holds full, unrestricted working rights in Australia.

TECHNICAL SKILLS

- **Front-End:** JavaScript, TypeScript, Angular, React, HTML, CSS, Bootstrap
- **Back-End:** Java, Python, C#, Spring Boot, Node.js
- **Databases & Data:** MySQL, MongoDB, Snowflake, SQL, Apache Kafka
- **Cloud & DevOps:** AWS, Azure, Git, Docker, Kubernetes, CI/CD, New Relic, TeamCity, SonarQube

PROFESSIONAL EXPERIENCE

Data Engineering Intern | Xero | Melbourne, VIC

Feb 2025 - Present

- Engineered high-availability back-end services in Python/C# for data processing, reducing latency by 15%.
- Improved system reliability to 99.5% uptime by implementing exponential backoff and infinite retries for transient API errors.
- Led the migration of 10+ repositories from SonarQube server to SonarQube Cloud, uplifting code quality by 20% by resolving all security and vulnerability issues.
- Deployed New Relic dashboards to monitor service performance and improve incident detection by 20%.
- Cut new user onboarding time by 25% through comprehensive API documentation and updated project READMEs.

Software Engineer-2 | Gupshup Technology Pvt. Ltd. | India

Jan 2023 - Oct 2023

- Enhanced backend system stability and performance, resolving critical bugs to increase overall system efficiency by 15%.
- Implemented critical data security protocols, including 2-factor authentication and data-at-rest encryption, to protect sensitive user information.
- Engineered the back-end integration for a new telephony vendor, establishing real-time event-driven data streams to reduce customer issue-resolution time.

UI - Mobile Developer | ODCEM Technologies Private Limited | India

Oct 2020 - Dec 2022

- Designed the UI for a new sentiment analysis feature, translating analytics into an intuitive, real-time visual dashboard for users.
- Developed the frontend components and user workflow for a new Single Sign-On (SSO) feature, creating a consistent login experience across the product suite.
- Served as a key UI developer for the Cloud Telephony integration, building new front-end components for in-app call handling and conversation display.
- Developed the responsive UI components to display over 1 million daily Instagram mentions and DMs, ensuring a clean, real-time feed on both web and mobile platforms.
- As a key contributor, re-built and adapted data visualisation components for the migration of analytics dashboards from Tableau to Zoho Analytics.
- Built the complete front-end experience for a new Reddit channel using Angular, creating all UI components to display real-time feeds and user interactions sourced from the back-end API.
- Built UI components to display synced client ticketing data from integrated CRMs.

EDUCATION

Master of Information Technology (Professional) Majoring in Data Science and Cloud Computing **Nov 2023 – Jul 2025**

Deakin University, Burwood Campus, Melbourne

WAM: 84.2 [High Distinction]

Relevant Courses: Software Deployment and Operation, Applied Software Engineering, Cloud Computing, Cyber Security Management, Computer Networks, Cloud Automation Technologies

Bachelor of Engineering - Information Science & Engineering

Aug 2016 – Sep 2020

The National Institute of Engineering, India

CGPA: 9.86 [First Class with Distinction]

Relevant Courses: Data Structures, Algorithms, Object-Oriented Programming, Database Management Systems

CERTIFICATIONS

- Mixpanel Fundamentals Certified (Mixpanel, Oct 2025)
- Agile Crash Course: Agile Project Management; Agile Delivery (Feb, 2025)
- AZ-900: Microsoft Azure Fundamentals (Microsoft, May 2024)
- JavaScript Essential Training (LinkedIn Learning, Nov 2023)

ACADEMIC PROJECTS

End-to-End AI Advisor & Workflow Automation (Xero Hackathon Project) **2025**

- Developed an AI-powered support advisor for the Xero Hackathon 2025, using a Retool Agent to answer internal queries about a behavioural analytics product.
- Developed a full-stack support tool, building the front-end UI (forms, AI agent) with Retool and a custom Python API to serve as the back-end.
- Engineered the Python API to integrate with GitHub and Slack, automating the entire PR creation workflow and sending team notifications, all while using Retool Databases for persistence.

Photofolio (Full Stack Web Application) **2024**

- Developed a full-stack platform for photographers using Node.js, MongoDB, Mongoose, and Bootstrap, focusing on portfolio management and user interaction.
- Ensured robust back-end performance and API reliability by implementing test coverage using Mocha and Chai.

High-Availability Web Application Deployment (AWS & IaC) **2024**

- Deployed a scalable, fault-tolerant web application on AWS using Infrastructure as Code (CloudFormation).
- Configured an Application Load Balancer (ALB) and Auto Scaling Groups (ASG) to automatically manage traffic and scale EC2 compute instances based on CPU load.
- Designed the complete cloud architecture, including a custom VPC, public/private subnets, and a Multi-AZ RDS instance to ensure 99.9% application uptime.

LEADERSHIP & ACHIEVEMENTS

- South Asia Student Ambassador (2024-2025), Deakin University
- Gold Medal Recipient for finishing top of the Information Science department (Bachelor of Engineering)
- Awarded 4 distinct Gold Medals in recognition of being the Best Girl passing out of NIE (2016-2020)
- Served as a Membership Evangelist and Public Interest Lead of the NIE IEEE Student Branch (NISB) and organized the state-level event AKCSC'18 (All Karnataka Computer Society Congress)
